Good Afternoon Mr. Kamradt-

Thank you for your October, 20, 2014 9:31 AM email regarding the proposed multistate ET Rover Pipeline Project (Federal Energy Regulatory Commission (FERC) Docket # PF14-14-000). Your email identifies concerns you have regarding pipeline safety, potential environmental impacts, property insurance and property values.

With our email, we are forwarding your email to Kara Harris, FERC project manager. FERC is the lead federal agency responsible for preparing the Environmental Impact Statement (EIS) for the pipeline project. Consequently, if you want your issues and concerns considered and addressed by FERC, we recommend you send your comments directly to FERC for their consideration.

EPA has agreed to be a cooperating agency during the FERC EIS process for this project. EPA will also provide EIS scoping comments to FERC and independently review and comment on FERC's Draft EIS and Final EIS under our NEPA and Section 309 Clean Air Act authorities.

If you have questions or would like to further discuss EPA's role in FERC's EIS process for this project, you may call me at 312-886-7501.

Virginia Laszewski

USEPA, Region 5

NEPA Implementation Section

A little info on ET Rover and what they're trying to pull off.

Please read the link above

To whom it may concern

Docket # PF14-14-000

In regards to the proposed ET Rover Pipeline project  
through Lapeer

County Michigan.

This proposed pipeline will have little or no benefits to the people of

our county or township, Hadley Township, Lapeer county Michigan.

All of the natural gas from this pipeline east of Livingston county is

going straight to Canada, and then sold back to some Midwest parts

of the United States.

Not only does this pipeline raise a serious safety concern in the event

of a leak or explosion which could cover almost ¼ mile radius, it would

negatively impact our ground water and our environment.

There are wetlands , lakes , streams {tributary's}, farm lands,

sanctuary's , residential , businesses , schools ,and the flint watershed

that would all be effected.

Also it would be almost impossible to insure any properties with a gas

pipeline running through it. And property value would greatly depreciate.

Thank you

Fred Kamradt
